**Subject:** Carter's question

Pam, I spoke with dave craymer today concerning Carter's question. Carter asked if the old ponds had been dewatered. The following ponds have not been dewatered: Chesterfield lower ash pond, Bremo west pond , bremo north pond, Chesapeake bottom ash pond (scheduled to be closed), possum pond e, possum pond d and possum ponds a, b and c. Possum ponds a, b and c still receive storm water run off. These ponds are from the table of active and inactive ponds prepared by power generation. It does not include the additional ponds that may fall under the ccr rule or effluent guidelines that have not been inspected.
